Records Folder - 1-18-53-12-53

# Office Memorandum • UNITED STATES GOVERNMENT

TO : Donald F. Musser, Chief, SF Materials      DATE: JULY 23 1953  
Accountability Branch, Division of Production, Oak Ridge

FROM : V. L. Parsegian, Director, Research Division, New York

SUBJECT: TRANSFER OF URANIUM ACCOUNTABILITY FROM NYOO TO ELECTRO  
CIRCUITS, INC., 401 EAST GREEN STREET, PASADENA 1, CALIF.

SYMBOL: RD:FWK

296.4 pounds of normal Uranium charged to me by our NYOO  
Accountability group has been shipped to the above contractor.  
This material is being used for test purposes in the development  
of non-destructive testing instruments. This material will be  
needed at the above site for at least another six months.

In view of the distance involved, it is rather awkward for me  
to continue to be accountable for this quantity of material.  
It is, therefore, requested that Mr. Donald Erdman be installed  
as Accountability Representative for Electro Circuits, Inc.,  
and that an accountability station be set up at Electro Circuits,  
Inc. through the San Francisco Operations Office.
